Mutual of America's group and individual retirement products are variable annuity contracts and are suitable for long-term investing, particularly for retirement savings. The value of a variable annuity contract will fluctuate depending on the performance of the Separate Account investment funds you choose. Upon redemption, you could receive more or less than the principal amount invested. A variable annuity contract provides no additional tax-deferred treatment of benefits beyond the treatment provided to any qualified retirement plan or IRA by applicable tax law. You should carefully consider a variable annuity contract's other features before making a decision.
